Website Design Services

Our website design service offers quality websites at a reasonable cost. The software we use is designed with ease of use in mind but produces great looking, functional websites. While our software may be a bit more limiting than traditional website building software, we find that it is quite effective for building websites that do not need too much intricacies. We can add e-commerce utilizing PayPal as well as adding a secure log in page (additional fees may apply for these services. Here is a list of some websites we have built that you can view to see if our style fits your needs:

rodeoflicks.com	focalpointcameraclub.org	junctioncitywi.com	junctioncitypicnic.com
jcsundowners.com	elks641.com or elks641.org	glcprorodeo.com	przinc.com
painted-sunset-ranch.com	martyssmallhomerepairs.com	mikeandbetseyshiwatha.com	NCWNAVHDA.org
lighteverythingdark.com	cowboyphotography.photos	martinphotography.org	portagecountysnow.com

All of our sites start with some 60 template designs to choose from that can be customized to a point to help start the website building process. The look and feel of your site will be determined by the template we start with and then we build from there to match your needs. We can add your logo, pictures, documents and custom text through out the site. With pictures, we can create a slideshow and we can add movies to the site as well.

Website pricing

We have found that an average website contains 4 to 7 “Pages” but can be many more. Examples of some web pages are:

- Home or Welcome Page
- About Us Page
- Contact Page
- Links Page
- Services Page
- Photo Gallery Page

Our base price for a website up to 5 pages is \$500.00 and \$75.00 per page after 5 pages based on your needs. The price will be agreed to up front prior to any work being done and includes web hosting and securing the URL (your website name if needed). We use GoDaddy.com® for these services and do not inflate the cost to us from GoDaddy.com®. In addition to our base price, there is a \$100.00 per year site maintenance fee + URL annual cost (after the first year) and you can request minor updates anytime throughout the year. We track the progress of traffic on each site using Google® Analytics. If major changes are needed, additional fees will be agreed upon prior to changes being made.
